

Commercial Services

A core speciality area for Olver Electrical is the design build and maintenance of commercial building electrical services.

We have been successfully providing electrical services to project managers, building facilities managers, property managers and property owners alike for the last fifteen years. Our accumulated experience and know how in this area is offered to all our clients.

Our program is a one stop shop for commercial clients who are offered our multi discipline expertise in Power, Lighting, Heating, Data and Security functions. Thus precluding the need to deal with multiple parties while keeping communication problems to a minimum.

Planned Maintenance

We ensure that, through a planned maintenance programme you are able to concentrate on your core business leaving us to ensure your re-lamping programme is taken care of and that your installation is fully compliant with current regulations and legislation. Our unique programme also covers the following services: Rapid response break down team Power consumption logging and management (Reduce Power Bills) Customized planned preventative maintenance (Reduce Down-Times) Safety inspections and portable appliance testing (Health & Safety) Retail Shop Fitting

A difficult building facilities management task for retail store managers is ensuring a safe, healthy and enjoyable shopping experience for their customers while at the same time, maintaining a safe, secure and reliable electrical infrastructure for its retail outlets. This is something that Olver Electrical have been helping store managers achieve for many years now with our professional and reliable support system.

Our fully trained staff have developed a sound appreciation for the industries requirements for adequate and clean power, accurate and cost effective lighting levels along with consistent and comfortable heating levels. We are also experienced at installing voice and data cabling.

It is also worth mentioning our versatility at working within our clients operating schedule.
