

Fire Alarms and Safety Lighting

Olver Electrical Contractors Limited undertakes the installation and maintenance of fire alarm systems complying with BS 5839-1:2002, and emergency lighting systems complying with BS 5266-1:1999. We have experience installing both fire alarm systems and emergency lighting in factories, offices, shops, schools, nurseries, care homes and flats.

As an NICEIC Approved contractor we are able to undertake this work and provide the required specialist certification for each installation.

Typical fire alarm systems would comprise of a fire alarm panel, fire bells or sounders, smoke detectors, heat detectors and break glass units, wired using fire-rated cables or mineral insulated cables. We are able to assist with your organisations responsibilities under the Regulatory Reform (Fire Safety) Order 2005, which came into force in October 2006.
