

## Spar Store, Upton Dorset, Refit

Olver Electrical have just completed the refit electrical work for Gillett's Callington Limited of their Spar Store in Upton, Dorset.

The store has undergone a massive makeover which has seen the joining together of 2 seperate businesses to make one great SPAR store and one that Gilletts Callington are very proud of.

The project, costing around £200,000, involved major building works both inside and outside the store which was then followed by a comprehensive refit to turn the store into one of the most up to date SPAR stores in the area.

Olver Electrical carried out all the electrical work in the store including all Voice and Data cabling.
